

Better budget engagement.

Providing public sector organizations the tools for meaningful financial transparency, accountability and participation.

Balancing Act's Budget Simulation tool now integrates seamlessly with Questica's OpenBook and Budget Suite

Budget Simulation

Informative, interactive, and in context.

- Easy to set-up, interactive tool to communicate financial information to stakeholders and get their informed feedback
- Can be used in face-to-face and online meetings with Meeting Mode, which turns the simulation into a facilitation tool
- Fine-tune questions to get meaningful input. Detailed reporting provides user-level data on stakeholder priorities
- Questica OpenBook and Budget integrations
- Taxpayer Receipt tool also available

OpenBook

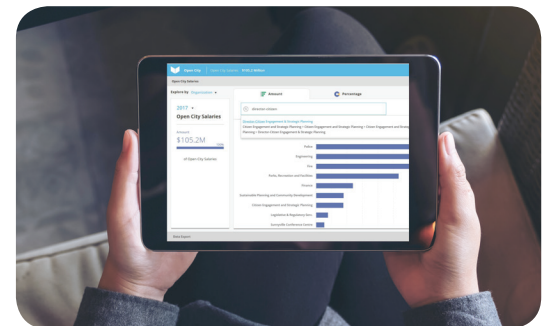

Build trust by being transparent and accountable.

- Showcase financial and non-financial data with interactive charts, tables and graphics with descriptive text, and informational pop-ups
- Share data through all social channels, access via web and mobile
- Project Explorer for Capital Budgets allows organizations to display on a map every infrastructure project, plus the budget, spend, docs, images, video and more.
- Integrates with Balancing Act's budget simulation tool

Budget

Say hello to accurate and collaborative budgeting.

- A cloud-based multi-user, multi-year operating, salary and capital budgeting system
- Integrates with financial, human resources and other systems such as OpenBook and Balancing Act

SPECIAL OFFER: Purchase both Balancing Act and OpenBook and receive 20% off the year one subscriptions for both.
